Benefits

Compact and Stylish Design

The stylish, compact metal housing of GS-105B/GS-108B fits any working environment. The affordable and reliable series comes with 5/8 ports to meet SOHO and home network expansion needs.

Gigabit Ethernet Boosts Speed up to 10/100 Times Faster

The ZyXEL GS-105B/GS-108B 10/100/1000 Mbps desktop switch is designed for reliable high-performance networks with speeds 10 times faster than Fast Ethernet connections. With the non-blocking switching fabric in full-duplex mode, the maximum speed can reach up to 2000 Mbps per port, while the Store-and-Forward service brings low latency and error-free packet delivering. The high-performance Gigabit Ethernet switch is perfect for fulfilling the demands of online gaming and multimedia streaming with the N-way auto-negotiation function.

Easy to Connect Multiple Devices

GS-105B/GS-108B is a 5/8-port desktop switch with plug-and-play capability. With the N-way auto-negotiation function, the GS-105B/GS-108B connects network counterparts with highest possible network speed and activates duplex mode automatically. You can easily connect networked devices such as PCs, network storages and print servers to the home network without any manual configuration.

Energy Saving via Link Status and Cable Length Detection

GS-105B/GS-108B also features green solutions that provide power-saving benefits without compromising performance. GS-105B/GS-108B automatically reduces power usage when it detects any shut down network device or inactive link. That is, power consumption of GS-105B/GS-108B adjusts according to the number of active network devices.

The GS-105B/GS-108B can also detect the length of connected Ethernet cables and adjust power usage accordingly. The shorter the Ethernet cable length, the less power it consumes.
